Title:

Comments: I support this Withdrawal. Words cannot express how deeply I feel about protecting the natural resources of the land we share. Rather than hearing the cry of Mother Nature we seem to be doing everything possible to destroy her and yet all life depends on her. We must preserve this precious site. Native Americans have long understood the sacredness of the natural world. Rather than focusing on exploitation and greed we would be well advised to listen and learn. Spending time alone or with family and friends in a clean healthy environment is a sure way to enhance our mental and physical health. Please preserve the Rapid Creek Watershed before it too becomes another victim of profit for money and lack of foresight. Thank you.
