First name: Irene

Last name: Morrissey

Organization:

Title:

Comments: USFS, Please stop mining in the Black Hills! In the first place, this land belongs to the Native Americans of South Dakota. Nothing gives US government permission to continue to carve up this beautiful land except the arrogance and lawlessness of the US government! The environment impact of further destruction is great and mining serves no purpose except to satisfy the greed of the mining industry. " only when the land is devastated will white men realize they can't eat money". Stop it! Sincerely , Irene Morrissey
