Comments: I write to ask that the proposed draft indicating no significant impact be withdrawn immediately! The impact of continued mining in this pristine area is immeasurable! Water quality stands to be negatively affected by mining operations; wildlife in the area will certainly suffer a negative impact on their ability to survive; mining in this area will undoubtedly have long term effects that will significantly diminish the enjoyment of visitors as the true pristine nature of the area is disrupted by day to day mining activity. Please consider, with the highest priority, the impact such disruption will have on the environment, the wildlife inhabitants and future sustainability of this area as a valued destination for visitors.
