Title:

Comments: I am writing to say YES to the mineral withdrawal.

I am a concerned citizen and a mother to three boys I hope will stay in the area. We often recreate on and around Pactola. We have a well as our water source and it is evident how much effect the ground water has on our water quality and contaminants. I respect that private businesses should have certain rights but when it comes to water quality, we should not compromise. Please protect our drinking water source and the recreational area that brings tourism and supports our local economy.
