Comments: I support the WITHDRAWAL of these lands to protect them and keep them from being poisoned. The destruction of our natural resources for, ultimately, the pursuit of wealth, for a very few rich people who would be able to afford the end products does not balance the benefit of keeping these lands untainted and in their natural form. The bio-diversity, which nature provides in her natural form, would be destroyed. The chain reaction from such practices as "developing" lands has never failed to lead to lower the standards of living for everyone. The beauty and peace of natural land is needed for everyone in the USA and I thank the Forest Service for their unflagging efforts on behalf of people, animals, and plants. Please help.
