Comments: Thanks for your time and consideration of this vital matter.

Please let the record stand that I support this Withdrawal.

It is difficult to keep brief about how important it is to protect the limited resources of clean water. It is easy to agree that preserving our limited resources of wild places for humans to enjoy and learn and appreciate is important. And it is vulnerable, in the face of economic interests, to acknowledge the need to honor the sacred lands which have not yet been desecrated. All of these things need to be said, and I am grateful for the freedom to say this.

I am asking the Forest Service to expedite the Withdrawal proposal to the Secretary of the Department of Interior.
