Comments: The Black Hills are of cultural value to the USA and its people. I support this withdrawal. Having been born in the midwestern US and having traveled to the Black Hills I believe it falls on those of us aware and educated on the importance of regional natural resources to work to ensure their continued health and wellbeing for future generations. It is a small thing in our present to remained focused on the preservation of these lands and waters for a future beyond our own lifetimes. I respectfully submit this request that the Forest Service expedite the Withdrawal proposal to the Secretary of the Department of Interior.
