Comments: As a Registered Nurse, with 40 years of hospital care, I am proud to stand as an advocate for vulnerable people anywhere, and in defense of a healthy environment for all. I support the withdrawal of mining from this important and fragile watershed, from which thousands of Americans depend for water. For far too long residents of this fragile landscape have been marginalized and are vulnerable in so many ways. Withdrawal of potential mining may begin to restore faith in our government and help with a positive and inclusive process. Please withdraw
Mining from consideration. Thank you.
