Comments: Two wrongs NEVER make a right. Please do not allow land that is sacred to the people who have been in North America the longest to be mined, after it has already been stolen. Living in Pennsylvania, I know full well that NO mining company has EVER mined without permanently polluting local waters and destroying pristine landscapes. And that, despite their many promises, their remediation efforts are scanty and produce nothing like the original landscape. So the notion that mining would do no harm is utterly specious. Please protect the Rapid Creek Watershed and expedite the Withdrawal proposal.

Thank you!
