Title:

Comments: As a concerned citizen who has been appalled by the destruction of fields and forests near me, I support the preservation and restoration of damaged land. This is especially true when these areas are sacred to native peoples, who were their original and truest stewards. These lands are vital to ensuring that there will be clean water and healthy populations of wildlife for the safety and enjoyment of future generations.

Therefore, I urge you to expedite the Withdrawal proposal for the Pactola Reservoir-Rapid Creek Watershed Withdrawal Project, to the Secretary of the Department of Interior.
