Title:

Comments: "I support this Withdrawal."

ALL LIFE needs clean water, preservation of pristine/sacred lands, or the value of recreation in the wild.

Forest Service - expedite the Withdrawal proposal to the Secretary of the Department of Interior.

There is NO planet B = are you willing to deprive your own future generations from clean water and lands?

Reservoirs have been drying up for years and daily it is on the news showing people with their tap water in jars that are clearly FILTHY!! Do you really want to wait until there is NO CLEAN DRINKING WATER LEFT!?
