Title:

Comments: Instead of the Forest Service's proposed recommendation, please go with Alternative C in the draft EA-the Wilderness Exclusion Alternative, excluding all designated Wilderness from the burning project plus the recommended Monarch Wilderness-South addition-a total of 871,472 acres.

The Forest Service proposal represents a vast human-driven manipulation of Wilderness. It goes against with the letter and spirit of the 1964 Wilderness Act. It cannot be advisable to light fires with drones and helicopters. Allow natural, lightning-caused fire to clear areas. It is unthinkable to manipulate Wilderness areas by cutting down "undesirable" trees and burn forests.

Please go with former Alternative C. Otherwise there is also Moses Mountain Recommended Wilderness to Alternative C.

Thank you for not invading the Wilderness areas with extreme and harsh measures that go against the meaning of the law.
