Title:

Comments: The forests need to be left alone so nature can clean and nourish itself. Human manipulation of the wildernesses is inconsistent with the wilderness act which says to keep national forests wild, untouched. It is better to let lightening do the work of cleaning out the forests. Cutting down trees is a human desire. When a tree dies it will fall and create a whole new ecosystem. Please leave the wildernesses untouched and let nature do its work.

Thank you

Brigitte Bernhardt
