Title:

Comments: I'm writing to ask that you spare all designated Wilderness areas from your prescribed burn and habitat manipulation project for the Sequoia and Sierra National Forests in order to comply with the Wilderness Act. To that end, I support Alternative C, the Wilderness Exclusion Alternative.

I further request that you also add the Moses Mountain Recommended Wilderness to Alternative C.

Please allow natural, lightning-caused fire to play its ecological role in ALL designated and recommended Wilderness on the Sequoia and Sierra National Forests. It's the only way you can comply with the Wilderness Act, and it's the right thing to do.
