Comments: I strongly support Alternative C, the Wilderness Exclusion Alternative. The Forest Service must exclude all designated and recommended Wilderness areas from its proposed cutting and burning plans in the Sequoia and Sierra National Forests to fully comply with the Wilderness Act. Additionally, the Moses Mountain Recommended Wilderness should be added to Alternative C. Rather than interfering with these protected lands, the Forest Service should allow natural, lightning-caused fires to perform their essential ecological role within the designated and recommended Wilderness areas of the Sequoia and Sierra National Forests.
