Title:

Comments: I oppose tree cutting and the use of prescribed fire in areas designated Wilderness or recommended to be designated Wilderness. Wilderness is designated so that Nature can run its course without interference from human, per the Wilderness Act.

I support Alternative C because it would exclude Wilderness from such practices.

You should allow natural, lightning-caused fire to play its ecological role in designated and recommended Wilderness. In this way, these areas will also serve as a "control" to monitor, measure and compare the treatments you apply elsewhere.
