Comments: Hello, I have been a Black Hills resident for 41 years and along with my children and grandchildren have enjoyed Pactola Lake for all of those years whether it was swimming, boating, fishing or camping. Keeping that water as clean and pristine as possible is important for all of the above recreational opportunities, not to mention our Rapid City drinking water. I fully support the Forest Service's proposal to protect the Pactola area with a mineral withdrawal. I only wish it was on a permanent basis instead of the specified 20 years.
