Title:

Comments: Please stop pretending to 'improve' the forests. Leave them be and let the natural process happen. Lightning will adequately improve the wild areas and prevent the unintended consequences of human interference such as introduction of non-native species, disruption of animal behavior, creation of roads for illegal activities, etc.

I support Alternative C, the Wilderness Exclusion Alternative for Sequoia and Sierra National Forests. This will be in line with the Wilderness Act. Please also include the Moses Mountain Recommended Wilderness to Alternative C.

Thank you.
