Title:

Comments: Please seriously consider Alternative C, the Wilderness Exclusion Alternative, for this cutting and burning project. The Forest Service should allow natural, lightning-caused fire to play its ecological role, at least, in designated and recommended Wilderness on the Sequoia and Sierra National Forests, as well as the Moses Mountain Recommended Wilderness.

The agency should exclude all designated and recommended Wildernesses from any proposed cutting and burning plans in order to comply with the Wilderness Act.

Most of these cutting and burning policies are based on outdated data that does not account for current climate changing conditions anyway.
