Comments: Thank you for taking the time to listen to the public regarding Sequoia and Sierra National Forests. Reading the 2020 California Air Resources Board's 2020 report on CO₂, plus many other peer reviewed documents, it appears more CO₂ is released through Forest Management (including controlled burns) than from wildfire. Therefore I support Alternative C, the Wilderness Exclusion Alternative.

The Forest Service should consider the report of California Air Resources Board and exclude all wildernesses from proposed cutting and burning, including Moses Mountain, Sequoia and Sierra National Forests.
