Title:

Comments: Thanks to the USDA/USFS for accepting public comments regarding this issue. I'm writing in support of Alternative C, the Wilderness Exclusion Alternative and the exclusion of all designated and recommended Wildernesses from proposed cutting and burning plans for the Sequoia and Sierra National Forests in compliance with the Wilderness Act. I would also like to see the addition of the Moses Mountain Recommended Wilderness to Alternative C.

Natural, lightning-caused fire plays a vital ecological role in strengthening ecosystems and fostering optimal biodiversity; it should be the order for designated and recommended Wilderness on the Sequoia and Sierra National Forests rather than that forced by human hand. Nature still knows best, and it is our obligation to let nature design Wilderness areas--we'll all be healthier for it. Thank you for helping keep our remaining wild places truly wild.
