Comments: I support Alternative C, the Wilderness Exclusion Alternative. It proposes a management approach for the Sequoia and Sierra National Forests that aligns with the principles of the Wilderness Act, which aims to preserve designated areas in their natural condition, untrammelled by human activity.

The inclusion of Moses Mountain Recommended Wilderness in Alternative C would further extend protections and allow natural processes, such as lightning-caused fires, to maintain the ecological balance within these wilderness areas. This approach reflects a commitment to safeguarding the wilderness character of these lands for current and future generations, ensuring that they remain a sanctuary for wildlife and a haven for those seeking the tranquility of untouched nature.

Thank you for the opportunity to comment.
