Comments: I support Alternative C, the Wilderness Exclusion Alternative. The Forest Service should exclude all designated and recommended Wildernesses from its proposed cutting and burning plans for the Sequoia and Sierra National Forests in order to comply with the Wilderness Act. The Forest Service should also add the Moses Mountain Recommended Wilderness to Alternative C. The agency should instead allow natural, lightning-caused fire to play its ecological role in designated and recommended Wilderness on the Sequoia and Sierra National Forests. The agency should stop playing God by burning trees to create an artificial regrowth of the forest during the dry seasons. In this case, do not be proactive but reactive. Wait for Mother Nature to light the fires in the forests when she is ready and then be on the ready with water to douse the fires out. Please, please, please do not cause further devastation to our planet by creating man-made fires. Thank you.
