Comments: Dear Madam or Sir,

While we recognize that fire has played, and continues to play, an important ecological role in these Wildernesses, the Forest Service proposal represents a huge human-driven manipulation of Wilderness that is inconsistent with the letter and spirit of the 1964 Wilderness Act. In fact, the Forest Service is even proposing to ignite some fires in Wilderness using helicopters and drones!

From a wilderness perspective, it is far better to allow natural, lightning-caused fire to play its role, rather than to invade Wilderness to cut down "undesirable" trees and burn forests based on human wishes and desires.

I would beg you to protect this Wilderness and adamantly I support Alternative C, the Wilderness Exclusion Alternative. The Forest Service should exclude all designated and recommended Wildernesses from its proposed cutting and burning plans for the Sequoia and Sierra National Forests in order to comply with the Wilderness Act.

Thank you in advance for doing what is right to protect these forests and the other animals who call them their home.
