Comments: I support Alternative C, the Wilderness Exclusion Alternative. The Forest Service should exclude all designated and recommended Wildernesses from its proposed cutting and burning plans for the Sequoia and Sierra National Forests in order to comply with the Wilderness Act.

These forests have not just national importance, but the older trees absorb tons more carbon, nature will provide more than enough opportunities to burn these trees without any help from us. These forests should be protected for as long as we can manage.

The Forest Service should also add the Moses Mountain Recommended Wilderness to Alternative C.
