Comments: Hello

Well, here we humans go with our hubris again. We have fought to tame the very essence of nature and it is biting us in the behind.

One of the things that makes America special is its Wilderness and its commitment to keeping things wild, and we need to continue to do so, before we lose the plants and animals, and eventually the planet to our blind consumption.

I support Alternative C, the Wilderness Exclusion Alternative. The Forest Service should exclude all designated and recommended Wildernesses from its proposed cutting and burning plans for the Sequoia and Sierra National Forests in order to comply with the Wilderness Act.

The Forest Service should also add the Moses Mountain Recommended Wilderness to Alternative C.

The agency should instead allow natural, lightning-caused fire to play its ecological role in designated and recommended Wilderness on the Sequoia and Sierra National Forests.

Let's allow nature to do its part, and cease unnecessary meddling.

Regards

Diana
