Comments: Dear usfs, I am in support of Alternative C, the wilderness exclusion alternative. It does not comply with the Wilderness Act of 1964. Yes, that seems a long time ago but that isn't really that long in terms of a forest. If you must do fire abatement on 2.5 million acres, then leave the 700, 000 + acres of Wilderness out of that equation. The prescribed burns are so overrated & over prescribed just to satisfy pencil pushers or other bureaucrats who make themselves appear with superior knowledge. The wilderness is not a control study, it is living as it's meant to do. Pls leave it that way.
