Comments: I strongly support Alternative C, the wilderness exclusion alternative. The forest service needs to comply with the Wilderness Act. It should exclude all designated and recommended wildernesses from its proposed cutting and burning plans for the Sequoia and Sierra national forests. All right, also strongly feel that the forest service should add the Moses Mountain Recommended Wilderness to Alternative C.

The Wilderness is fragile and can not survive if humans decide to take matters into their hands and manipulate what nature has done for millions of years. Changing our Wilderness with burning and cutting of forests is not 100% agreed upon scientifically conclusive. When the science is 90% in agreement about this management effort, then that will be a different argument.
