Comments: It's clear that fire has played an important ecological role in the Wilderness areas, but the Forest Service proposal represents a huge human-driven manipulation of Wilderness that's inconsistent with the letter and spirit of the 1964 Wilderness Act. Why would the Forest Service ever propose to ignite some fires in Wilderness using helicopters and drones?

For a Wilderness, it is far better to allow natural, lightning-caused fire to play its role, rather than to invade Wilderness to cut down "undesirable" trees and burn forests based on human wishes and desires.
