Comments: I see that the U.S. Forest Service has moved forward a massive burning project for the Sequoia and Sierra National Forests in California that covers 2.4 million acres-including all 866,741 acres of designated Wilderness on both national forests!

While I recognize that fire has played, and continues to play, an important ecological role in these Wildernesses, the Forest Service proposal represents a huge human-driven manipulation of Wilderness that is inconsistent with the letter and spirit of the 1964 Wilderness Act. In fact, the Forest Service is even proposing to ignite some fires in Wilderness using helicopters and drones!

From a wilderness perspective, it is far better to allow natural, lightning-caused fire to play its role, rather than to invade Wilderness to cut down "undesirable" trees and burn forests based on human wishes and desires.

I support Alternative C, the Wilderness Exclusion Alternative. The Forest Service should exclude all designated and recommended Wildernesses from its proposed cutting and burning plans for the Sequoia and Sierra National Forests in order to comply with the Wilderness Act.

Under Alternative C, the Forest Service would exclude all designated Wilderness from the burning project plus the recommended Monarch Wilderness-South addition-a total of 871,472 acres.
