Comments: Greetings,
I disagree either the withdrawal as it seems to be more politically motivated than any pertinent ecological necessity.
Furthermore if the do gooders want to actually be concerned about water quality, why don't they start with the water they are flushing down Rapid creek east of Rapid City. Especially since you are flushing phosphates, pharmaceuticals and other nasty nasty pollutants right down your sewers.
Of course their response is, "oh that's not what we are about". Your priorities are completely backwards and this politically motivated withdraw proves it!
Thank you
