Title:

Comments: I support Alternative C, the Wilderness Exclusion Alternative, which would exclude all designated Wilderness from the cutting and burning plans for the Sequoia and Sierra National Forests. These forests are very sacred and fragile. Nature has a way of taking care of these forests and keeps the eco system flourishing so please allow any fires to occur naturally - man-made fires do more damage than nature! I would also request you add the Monarch Wilderness-South and Moses Mountain Wilderness to this also. Thank you.
