Title:

Comments: Please make Alternative C the Forest Service's Proposed Action, which excludes all designed and recommended Wilderness areas from the proposed cutting and burning plan for the Sequioia and Sierra National Forests so as to comply with the Wilderness Act. Also, Moses Mountain recommended Wilderness Areas should be added to Alternative C and not burned.

I recognize that fire plays an important ecological role, but it is better to allow natural, lightning caused fire. Forests should not be burned and so-called "undesirable" trees cut down based on human wishes and desires.

Please allow natural, lightning caused fire to only in designated and recommended Wilderness in the Sequioia and Sierra National Forests.
