Comments: I'm writing this to indicate that I support this withdrawal proposal and in fact I ask that the Forest Service expedite this withdrawal proposal. The reason why I support it is because it is imperative that those of us living in the United States maintain a clean environment for our own sakes, the sakes of our children and grandchildren, and for all future inhabitants of these lands. Lands that are held sacred by Indigenous Nations, such as the Black Hills are, are held sacred for good reason. These lands are essential parts of the ecosystem, upon which other smaller and larger ecosystems frequently rely. In a world where we are experiencing a mass die-off of species, a rapidly changing climate, and a polycrisis of health and mass death, supporting the fights to preserve such lands against the dangerous harms of toxic mining are essential. Don't let our children down.
