Comments: You guys need to stay out of the wilderness areas. This planet has managed itself just fine until we, humans, multiplied out of control and arrogantly started to intervene in every facet of life on this planet. The Sequoia and Sierra National Forests do NOT need prescribed burns or any other human interventions; these beautiful forests CAN and WILL manage themselves, as they have been doing for millennia.

I support Alternative C, the Wilderness Exclusion Alternative. The Forest Service should exclude all designated and recommended Wildernesses from its proposed cutting and burning plans for the Sequoia and Sierra National Forests in order to comply with the Wilderness Act.

The Forest Service should also add the Moses Mountain Recommended Wilderness to Alternative C.

The agency should instead allow natural, lightning-caused fire to play its ecological role in designated and recommended Wilderness on the Sequoia and Sierra National Forests.
