Title:

Comments: Your agency is supposed to protect the forests not destroy them. I cannot believe you are still intentionally wanting to destroy the most beautiful forests in the world that we are so lucky to have here in the United States for what? There have been way too many forest fires that have been intentionally set we certainly do not need more. These forests were given to us by God and should remain until He takes them away not by some un intelligent groups of people for no apparent good reason.
