Comments: Withdraw all mining operations NOW. AND FOREVER! We must preserve our sacred spaces for future generations! And we need to STOP the toxic trajectory we have been following up to now! In light of the rapidly progressing unpredictable climate crises-- Mother Nature is trying to warn us!!! And despite knowing how humans have been polluting our air and water for HALF A CENTURY and still have not changed our ways. WE CANNOT KEEP KICKING THE CAN DOWN THE ROAD.
DO THE RIGHT THING-- our grandchildren are depending on us
