Comments: Hello, Thank you for this opportunity to comment. I would like to see greater protection for the mature forests in this plan as they are most at risk.

Please remove the 549 acres of remaining complex mature forests from the harvest plans; protect all Douglas-fir trees with a 30" diameter or more in matrix stands; and provide a no-cut buffer of 1.5 to 2 drip lines on all trees with a 40" diameter or more to protect their root systems from the negative impacts of heavy machinery.

Thank you.
