Title:

Comments: In the name of US citizens, cease all clear cutting of trees on ALL of our public lands. We are in the midst of multiple climate crises and loss of biodiversity around the world; cease all clear cutting our our public forests NOW.

This is the least of what the USFS can do:

Drop the 549 acres of remaining complex mature forests from the harvest plans;

Protect all Douglas-firs trees with a 30" diameter or more in matrix stands; and

Provide a no-cut buffer of 1.5 to 2 drip lines on all trees with a 40" diameter or more to protect their root systems from the negative impacts of heavy machinery.

This video sums up our concerns; attention must be paid; you all work for us:
