Comments: I urge the Forest Services to do more to protect large diameter (older) Douglas fir trees from root damage and soil compaction while operating heavy equipment nearby and i urge Forest Services to exclude the entire the mature forest from timber sale. When replanting following the clearcut, pay attention to protect the land from invasive species and do not turn the Little White Salmon forest into a tree farm for timber industry. While i support thinning for fire resilience I am very concerned about the loss of habitat this plan will inevitably result for multiple species that call this forest home.
