Comments: I'm writing to you today to voice my opinion on withdrawing toxic mining from Black Hills.

Without a doubt this pristine and sensitive 20000 acres at Rapid Creek Pactola Watershed is Sacred land to the indigenous peoples . For that reason alone I think it's time to end toxic use of the land.

As you know ... President Biden's address yesterday to the Indigenous People was an apology for past history of our abuse and misuse of land that did not belong to this country.

Let's end past history now at Black Hills by ending toxic mining altogether!!!!

Thank you.
