Title:

Comments: PLEASE leave our CA forests alone!! We have had enuf devastation just through all the wildfires we have had already, and this upsets the whole system for wildlife- THEIR home is being taken away daily by fires, logging, construction, etc. and we MUST leave what they have left alone- we can't stop Mother Nature and what she has planned for them, but we CAN control what HUMANS do!! PLEASE LEAVE THEIR HOME ALONE AND DO N'T TAKE ANY MORE AWAY FROM THEM!! I visit these forests every yr and have seen the devastation caused by these actions and it is NOT pretty OR necessary- so please leave all the wildlife areas alone, so they can survive for all our future generations!
