Comments: Water, sacred lands and environmental protection are crucial and important practices in our country and in the world. Mining creates toxic damage and must be stopped. It is no longer viable
to create irreparable damage to our environment that must be protected. I urge you to stop threatening the well being of Native American communities. Threatening the safety of water sources is a sacred duty of all citizens. Thank you for protecting Water our most precious resource. Land and soil create healthy communities and precious resources for communities at risk of long term damage to land, water and air.
