Comments: I am strongly opposed to this project for several reasons. The most important reason for me is the desecration of Native lands. Haven't we done enough to destroy these ancient cultures with our colonialism and dismissive attitudes. What they have that us usurpers don't have, is the respect for the land. Look where our environment is now. Disappearing species, climate change, toxic pollutants. All of this so Los Alamos can build more plutonium pits. Just stop it, already. Pay attention to the Indigenous people. They can show you the way out of this mess before our entire civilization is destroyed.
