Comments: Pactola is a scared place. Not only to the species that reside there, fish etc ... But to all of the U.S. it a a place of refuge, healing, drinking water..... It must be kept clean and free of any and all mining and digging and building. We the people of rapid city rely on nature. We chose to live here and use this as our home. Some born here, such as my father and so on. Now my children and grandchildren... Please take we everyone including the ones that cannot speak for them and take them into consideration. Test our animals and test water quality and make it public. And use that to keep pactola safe. Ohan
