Comments: I support the withdrawal of mining in the Pactola Area. Our forest is a beautiful home to people, plants, animals, fish, insects, etc who need and deserve clean water and land as well as an environment free from the noises and other stressors of industry of mining. As other commenters have described, this will benefit tourism, protecting the environment, protecting the health of our people with clean water, and much more. I value these areas immensely more than what limited economic benefits (which are privately owned) may come of mining.
