Title:

Comments: I support the Cascade Forest Conservancy in asking for modifications in the "harvest" plan, including: Removing 549 acres of remaining complex mature forests from the plans, protecting Douglas Firs that measure DBHs of 30", leave a buffer of 2 drip lines on all trees of 40"+ so that root systems are protected from heavy machinery. This is the least -- the absolute least -- we can do on our PUBLIC lands to mitigate climate and ecological catastrophe.
