Title:

Comments: I'm disappointed to read that Alternative C was not chosen for the plan of action. The Forest Service should exclude all designated Wilderness from the burning project. These wilderness areas should be protected from tree cutting, burning and manipulation.

This human-driven manipulation of Wilderness that is not in the spirit or intent of the 1964 Wilderness Act - especially igniting fires in Wilderness using helicopters and drones.

It is far better to allow natural, lightning-caused fire to play its ecological role, rather than to invade Wilderness to cut down trees and burn forests based on human intervention.

Please keep Wilderness on the Sequoia and Sierra National Forests wild!

Thank you.
