Comments:

I support this Withdrawal from sacred He Sapa(Black Hills) of toxic mining. There is nothing worth destroying the pristine beauty of the headlands of the Rapid Creek Watershed. Yes the U.S. Forest service should require mining companies to withdraw from this sacred land. This land is sacred to all people who cherish and value the sacredness of mother earth and all life. I am one of these people. We should all make it a priority in what we value to protect and preserve the earth and all the creatures, the water, the air, the plants all living beings from toxic mining. US Forest Service please expedite this withdrawal with the Secretary of the Department of the Interior.
