Comments: I support the withdrawal proposal of any and all mining projects, projects that will cause harm, stress and long lasting environmental effects in the He sapa. Please expedite this withdrawal proposal to the department of the interior. Humans cannot alter the land and the environment without affecting the the people and the animals, the plants and the water. The standards of 'significance impacts' is shortsighted and these practices need to be restricted. Western thought to 'improve' the land only leads to degradation, pollution and inevitably a path to uninhabitable lands.
